

BONGANI DADEU MPOFU

B-Com Information Systems | Data Engineering | App Development

Johannesburg, South Africa | mpofubongani088@gmail.com | +27 66 410 7767 | [LinkedIn](#)

PROFESSIONAL SUMMARY

Final-year B-Com Information Systems student at the University of Johannesburg, building expertise in data engineering, systems development, and business management. Proficient in SQL, Python, JavaScript, Power BI, and cloud technologies, with hands-on experience in full stack app development, backend development, and cybersecurity fundamentals. A self-directed, collaborative learner who excels in problem-solving and adapts quickly to new environments. Passionate about leveraging technology and data to drive operational efficiency and informed decision-making, with a strong foundation in computer literacy, effective communication, and digital strategy. Actively seeking opportunities to apply academic and practical skills in information systems, technology, or business-focused roles.

EDUCATION

BCom in Information Systems

Feb 2024 – Nov 2026 (Expected)

University of Johannesburg

- Database Design & Management
- Information Systems Analysis & Design
- Systems Development (Programming)
- IT Project Management
- Business Management | Entrepreneurship & Innovation

National Senior Certificate — Academic Top Achiever

Completed 2023

MH Baloyi Secondary School

- Technical Mathematics
- Electrical Technology (Power Systems)
- Technical Sciences
- Engineering Graphics and Design
- English FAL | Setswana HL | Life Orientation

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Data Engineering Programme (In Progress)

Feb 2026 – Present

ALX Africa

- 7-month online programme (20–30 hrs/week) covering the full data engineering lifecycle
- Phases: Professional Foundations · Data Analytics · Python Programming · Data Engineering Specialisation
- Specialisation: DE 101, Big Data Fundamentals, Docker, Apache Airflow, PySpark
- Tools: Python, Docker, Apache Airflow, Apache Spark, Apache Kafka, PostgreSQL · AWS Cloud Practitioner module

Certificate in Full Stack Development

Completed 13 July 2025

FNB App Academy (IT Varsity)

- Full stack web development: HTML5, CSS3, JavaScript, APIs, data input & processing, and backend development

- App strategy, UX/UI design principles, and user-centric development with version control via GitHub
- Business development, AI in development, marketing, and funding concepts — Certificate No. A0TYAA072025

Python Essentials 1 – Statement of Achievement

Dec 17, 2024

Cisco Networking Academy / OpenEDG Python Institute

- Designed, debugged, and refactored Python 3 programs using algorithmic thinking and the Python Standard Library

Introduction to Cybersecurity

Dec 14, 2024

Cisco Networking Academy

- Covered online safety, common cyber threats, vulnerabilities, and methods to protect organisations against attacks

Programming & GRIT Bootcamp — With Distinction

Nov 28, 2024

Grit Lab Africa

- Intensive bootcamp (ID: JBS-GL-920) covering problem-solving, algorithms, and Python programming — awarded With Distinction

TECHNICAL SKILLS

Data Engineering	Apache Airflow · Apache Spark · Apache Kafka · Docker · PostgreSQL · PySpark · AWS Cloud
Cybersecurity	Cyber Threat Awareness · Vulnerability Assessment · Network Security Fundamentals · Online Safety
App Development	HTML5 · CSS3 · JavaScript · Django · C# · Backend Development · GitHub · VS Code · PyCharm
Programming	Python · SQL · JavaScript · C# · Jupyter Notebook · Git
Analytics & Reporting	Power BI · Excel · Data Storytelling · Executive Reporting
Microsoft Suite	Excel · Word · PowerPoint · Microsoft 365
Emerging Tech	AI Integration · Cloud Concepts · Design Thinking · Agile Methodology
Soft Skills	Stakeholder Communication · Problem-Solving · Presentations · Attention to Detail · Self-Directed Learning
